

Date:

1. Visual inspection of the box from the outside (dirt/damage)
2. Check fastening of the box
3. Item designation readability
4. Visual inspection of the box from the inside (humidity, dirt, brittle plastic)
5. Check cables, lines, switches for tight fit
6. Functional test of buttons and switches (with the system switched off)
7. Cleaning with damp cloth, make item designation readable again

[illegible]

Item designation	Result of the check	Remaining work

Date, signature
